DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, drawn to system/method/computer program for verifying the availability of a back-up secure tunnel, classified in class 713, subclass 201.
 - II. Claims 38-45, drawn to method for determining the identity of a back-up secure tunnel and establishing the back-up secure tunnel connection, classified in class 713, subclass 151.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as verifying the availability of a back-up secure tunnel; invention II has separate utility such as determining the identity of a back-up secure tunnel and establishing the back-up secure tunnel connection. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for one group is not required for any other groups, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with Gerald Woods on April 22, 2004 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-37. Affirmation of this election must be made by applicant in replying to this Office action. Claims 38-45 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of Booth, US Patent 6,668,282 in view of Brodfuhrer, US Patent 6,230,281. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is obvious in view of the patent application. Claim 1 of Booth's application discloses the same limitations as claim 1 of the present application with the exception of using an active secure tunnel instead of a back-up secure tunnel.

Brodfuhrer discloses a back-up system to keep a network in full operation when a manager node on the network becomes disable (col. 1, lines 31-40).

It would have been obvious to one of ordinary skill in the art at the time of the invention to implement the back-up secure tunnel, as Brodfuhrer teaches, so as to provide a reliable network.
